

Heart
&Stroke™

Are you taking ASA to prevent heart disease or stroke?

1

If you do **not** have a history of heart disease, stroke or vascular disease, taking ASA (for example, Aspirin, Entrophen, Novasen) daily could potentially **do more harm than good.**

2

Continue to take ASA if you have been told to do so by your health professional.

3

Talk to your health professional before making any changes to using ASA.
